

3D Animator and Rigging Artist with production experience at the National Film Board of Canada. Skilled in Maya, Blender, and ZBrush, with a focus on expressive character animation and performance-driven storytelling. Strong understanding of animation pipelines and shot collaboration gained through direct work with directors and animation teams.

EXPERIENCE

3D Animator / Rigging Artist, National Film Board of Canada (NFB), Dec 2024 – Oct 2025

Rigged characters and prepared assets for animation on an undisclosed short film.

Collaborated with the director and animation team in an animation-focused production environment.

Provided production support to meet animation and shot needs during production.

Independent Mod Developer, AAA Game Title

Created and shipped game-ready 3D character assets, including modeling, rigging, texturing, and expressive character posing, for use within community modding tools.

Released publicly with 11k+ collective downloads and 148k+ combined views, with players actively using the character assets for in-game presentation and posing.

Engaged directly with users for feedback, iteration, and troubleshooting.

Freelancer, Self Employed

Created visual materials such as posters and covers, applying strong composition and storytelling skills.

Delivered client-ready 3D and 2D concepts tailored to production needs.

Rigged characters for external projects, preparing assets for animation handoff and production use.

Design Intern, Premise Design

Developed visual concepts and solutions that informed client campaigns.

Reworked newsletter templates, improving readability and design impact.
